

Follow the **LEADER** ... Our competition does

From **ALBERS** – the Innovators! The company that brought you the first original self-locking headlock now introduces ...

NEW

A whole new concept in cow comfort ...
ALBERS ACCU-LOCK (patent pending)

17" standard cow-entry opening — so it's always in "large entry" mode! **COMFORTABLE!!**
Note the double pivot bars which allow your cows comfortable lunge space forward, left and right!

ADVANTAGES:

- » **Standard 17" opening** (always in large entry mode) – a direct, balanced opening makes for easy cow/bull entry so there's no need for "optional" labor intensive add-ons.
- » Allows for **easy entry** to facilitate heifer training.
- » **Same great**, time-proven **ALBERS** frame **design** eliminates unwanted double-cow entry.
- » Takes **half the effort** for a quicker **lock-up!**
- » **Safe**, individual cow release – in front of the cow or from behind.
- » The low lockrail makes for **easier shot placement**
- » **Quiet**
- » Rectangular tubing used on horizontal members for added **strength!** Horizontal rails are hot-dipped!
- » **Compare our panel weights** with the competition.

We all know that time is money! A lock-up that is easier to enter, creating a quicker and more positive lock-up, will provide more cow comfort.

Your cow spends most of her time in the headlock eating in the feed position. **ALBERS ACCU-LOCK** (patent pending) moves with her as she feeds. Both sides pivot, creating easier cow movement, meaning more comfort, which means more feed intake, which will produce more milk – which means more \$\$\$!!!

At any time, but especially when milk prices are low, this lock-up can make the difference!
